

This is not mandatory reading, but here's the code we'll run in the "Resource Monitors" video. It may come in handy when you're doing the associated hands-on assignment.

```
---> create a resource monitor
CREATE RESOURCE MONITOR tasty_test_rm
WITH
    CREDIT_QUOTA = 20 -- 20 credits
    FREQUENCY = daily -- reset the monitor daily
    START_TIMESTAMP = immediately -- begin tracking immediately
    TRIGGERS
        ON 80 PERCENT DO NOTIFY -- notify accountadmins at 80%
        ON 100 PERCENT DO SUSPEND -- suspend warehouse at 100 percent, let queries
finish
        ON 110 PERCENT DO SUSPEND_IMMEDIATE; -- suspend warehouse and cancel all
queries at 110 percent

---> see all resource monitors
SHOW RESOURCE MONITORS;

---> assign a resource monitor to a warehouse
ALTER WAREHOUSE tasty_de_wh SET RESOURCE_MONITOR = tasty_test_rm;

SHOW RESOURCE MONITORS;

---> change the credit quota on a resource monitor
ALTER RESOURCE MONITOR tasty_test_rm
    SET CREDIT_QUOTA=30;

SHOW RESOURCE MONITORS;

---> drop a resource monitor
DROP RESOURCE MONITOR tasty_test_rm;

SHOW RESOURCE MONITORS;
```
